- Our enclosures are built and furnished to recreate an environment in which the animals can exhibit their natural behaviors. This may involve them being up high on a tall platform or retreated from public view, so you may need to look carefully to see them. If you cannot see the animal, please return again later. Please do not bang on the glass or shout at them.
- Please keep in mind that keepers may start calling the animals into their indoor facilities 35 minutes prior to the park's closing time.
- Unsupervised children will not be allowed into the zoo.
- It is very important that visitors respect barriers at all times. Arms and legs must be kept behind the barriers as well.

### OUR MISSION

RSE is committed to improving its facilities each year. With a number of major exhibits planned to open in the following years, this is a time of changes and advances for our zoo. Our sincere gratitude goes to our visitors, for making possible our progress toward a better zoo.

### CONSERVATION IS ALSO ABOUT FLORA!

RSE is itself a vast palm-tree grove, with over 4,000 specimens. Moreover, we opt for sustainable gardening, by planting vegetation that is specific to this region and climate.

WE ARE GUESTS IN OUR ANIMALS' AND PLANTS' HOME. IT IS VERY IMPORTANT THAT WE RESPECT THEM AND THEIR TRANQUILITY.
